A Treestand That Will Change the Way you Hunt...Forever

Have you ever been sitting up in your hunting stand and thought, "I'm not climbing anymore!" then we've got your solution. You just go out and have fun and leave the climbing to us with the new TreeTram™ by Reechcraft. This revolutionary new tree stand will enable hunters, like you, to reach all new heights on the hunt. The

TreeTram tree stand combines safety, power and portability into one affordable package. For years, hunters have continued to "get by" using the current tree stand technology, that relies on the hunters ability to climb a tree or a ladder

regardless of physical ability, desire or level of safety consciousness. The three most popular tree stands include hang-on tree stands, climbing-type stands and ladder stands. While each one of these stand options has useful attributes, any improvements that have been made do not address pertinent issues, such as, age and ability;

not to mention the #1 hunting accident is falling from height.

TreeTram's patented design incorporates the best features of other tree stands, and merges them into one affordable product. The TreeTram

allows anyone, at any level, to hunt from the vantage point of a tree. TreeTram is an ultra-portable tree stand that can be transported quickly and placed against virtually any tree. Crafted of durable aluminum and steel, the TreeTram will safely transport you and all of your gear up to 15' in less than 60 seconds.

The TreeTram is ideal because it improves

the overall safety for young and old hunters by allowing them easy access from the ground. This amazing technology enables hunters with physical limitations to continue to do what they love to do...hunt.

The TreeTram's durable construction with proven PowerTrak™ technology ensure years of

safe, easy stand hunting. With its powerful 120:1 transmission, an 18V cordless drill has plenty of juice to lift 350 lbs up and down several times on 1 charge. Take an extra battery along just to make sure... and yes, if all else fails and you lose power, there's a manual crank to get you back down again.

ReechCraft is a recognized leader in access equipment and has been designing innovative solutions to challenging problems for more than 15 years. Call 888.600.6160 or go to treetram.com for more information or to locate a dealer near you. Happy hunting!
